PLP Pitch Deck - First Draft Content Submission

Project Concept: EduFlex - AI-Powered Modular Learning Platform for Working Professionals

---

Slide 1: Title & Vision

- **Company Name:** EduFlex AI
- **Tagline/Vision:** Transforming traditional degrees into bite-sized, career-aligned micro-credentials for the modern workforce.
- **Core Message:** Continuous learning tailored seamlessly around busy work schedules.

Slide 2: The Problem

- **Problem 1:** Working professionals lack the time to commit to traditional 2-4 year university degrees.
- **Problem 2:** Standard online courses have a 90% drop-out rate due to a lack of personalization and high friction.
- **Problem 3:** Rapid technological changes mean skills learned today become obsolete within 3 years, leaving a massive industry skills gap.

Slide 3: The Solution

- **Solution:** A mobile-first, modular learning system that broken down into 15-minute interactive hyper-lessons.
- **Benefit 1:** High personalization via an AI engine that adapts the curriculum to the user's specific daily job challenges.
- **Benefit 2:** Direct integration with enterprise HR platforms to instantly verify and unlock internal company promotions.

Slide 4: Market Validation (Why Now?)

- **Macro Shift:** Remote work and rapid AI adoption have forced companies to upskill employees or face operational disruption.
- **Regulatory Catalyst:** Global corporate tax incentives are increasingly favoring structured, recorded employee development budgets.
- **Urgency:** Corporate training budgets have increased by 24% year-over-year post-2024, yet engagement remains at an all-time low.

Slide 5: Market Size (TAM, SAM, SOM)

- **Total Addressable Market (TAM):** $350 Billion global corporate e-learning and workforce development industry.
- **Serviceable Addressable Market (SAM):** $45 Billion focus on English-speaking mid-career technology and management professionals.

- **Serviceable Obtainable Market (SOM):** $120 Million primary initial target capturing 0.25% market share via enterprise B2B accounts.

Slide 6: The Product

- **Core UX Flow:** 1. Quick 3-minute career goal assessment. 2. Auto-generated, personalized modular learning track. 3. Interactive daily micro-lessons with chat-based AI mentorship.
- **Key Technology:** Proprietary vector-embedding engine that maps course material against active LinkedIn job requirements.

Slide 7: Business Model

- **Revenue Stream 1 (Primary):** B2B Enterprise SaaS — $15 per employee / month, billed annually.
- **Revenue Stream 2 (Secondary):** B2C Premium Tier — $29 per user / month for ad-hoc professional certification tracking.
- **Key Metric:** Aiming for Net Revenue Retention (NRR) > 110% through scalable internal corporate seat expansion.

Slide 8: Go-To-Market Strategy (GTM)

- **Inbound Channel:** Content marketing focusing on whitepapers detailing the 'ROI of corporate training' targeting HR executives.
- **Outbound Channel:** Direct account-based marketing (ABM) targeting Learning & Development directors at mid-market tech companies.
- **Partnerships:** Joint integrations with popular HRIS platforms like Workday and BambooHR to ease deployment.

Slide 9: Competitive Analysis

- **Traditional Competitors:** Coursera, Udemy, LinkedIn Learning (Broad content, but low completion rates and zero personalization).
- **Our Competitive Advantage:** Our hyper-modular system operates in 15-minute workflows with real-time AI adjustments.
- **The Moat:** Deep integration into enterprise career progression tracks creates high switching costs for enterprise customers.

Slide 10: Traction & Roadmap

- **Q1-Q2 (Past):** Completed alpha testing with 200 users; achieved an unprecedented 74% course completion rate.
- **Q3-Q4 (Current):** Launching closed beta with 3 mid-market corporate design partners (Totaling 1,500 active seats).
- **Next 12 Months:** Scale to $500k ARR, build automated enterprise compliance reporting modules, and hire 2 full-stack engineers.

Slide 11: The Team

- **CEO & Co-Founder:** Product leader with 6+ years experience building scalable workflows at top-tier ed-tech startups.
- **CTO & Co-Founder:** Senior Machine Learning Engineer; former architecture lead for consumer-facing natural language applications.
- **Advisory Board:** Includes a seasoned Corporate Chief Human Resources Officer (CHRO) and a university professor in learning design.

Slide 12: The Ask / Call To Action

- **Funding Target:** Raising a $750,000 Seed Round to expand our product engineering team and accelerate our B2B go-to-market rollout.
- **Milestone Goal:** This capital runway will support operations for 18 months, engineering a secure transition to $2M ARR.
